Climate Justice & Resilient Communities

Learner guide | SWP-032 | School of Disaster Response & Crisis Intervention

This guide supports a three-part learning sequence for Climate Justice & Resilient Communities. By the end of the course, you should be able to use a rights-based, community-led approach to identify climate-related social inequities, strengthen adaptive capacity, and support accountable climate action within a professional role.

Practice notice: Apply the law, organisational policy, supervision requirements, and approved referral pathways that govern your setting. This material supports learning and does not replace urgent safeguarding, clinical, or legal procedures.

Learning objectives

- Use a rights-based, community-led approach to identify climate-related social inequities, strengthen adaptive capacity, and support accountable climate action within a professional role.
- Apply the key ideas from Climate risk, inequity, and rights.
- Apply the key ideas from Community-led adaptation and resilient services.
- Apply the key ideas from Just transition, advocacy, and accountability.

Course structure

Module	Focus	Suggested study time
1. Climate risk, inequity, and rights	unequal exposure, vulnerability, livelihoods, displacement, health, disability inclusion, gender, participation, and human dignity	10 to 15 minutes
2. Community-led adaptation and resilient services	local knowledge, accessible planning, social protection, livelihoods, community assets, inclusion, and adaptation partnerships	10 to 15 minutes
3. Just transition, advocacy, and accountability	climate decisions, distribution of benefits and burdens, community voice, responsible evidence use, monitoring, and constructive advocacy	10 to 15 minutes

Module 1 Climate risk, inequity, and rights

This module focuses on unequal exposure, vulnerability, livelihoods, displacement, health, disability inclusion, gender, participation, and human dignity. Work through the material with a current practice setting in mind, but remove identifying information from any examples you record.

What to pay attention to

- Unequal exposure
- Vulnerability
- Livelihoods
- Displacement
- Health
- Disability inclusion
- Gender
- Participation
- Human dignity

Learning sequence

Start by defining the purpose of climate risk, inequity, and rights in relation to the course outcome. Notice where professional judgement is needed and where a local procedure must guide the next step.

Examine the practical implications of unequal exposure, vulnerability, livelihoods, displacement, health, disability inclusion, gender, participation, and human dignity. Separate observations from assumptions, identify strengths as well as concerns, and be clear about information that must be checked with a person, family, colleague, or approved source.

Use a respectful, collaborative approach. Explain your role, seek informed participation where appropriate, and document only information that is relevant, accurate, and necessary for the purpose of the work.

When a concern exceeds your role, supervision, competence, or authority, pause and use the correct escalation route. A prompt referral and a clear handover can protect continuity of support.

Practice reflection

Choose a de-identified practice situation. What information would help you work through climate risk, inequity, and rights safely, and what would require consultation or a local policy check?

Module 2 Community-led adaptation and resilient services

This module focuses on local knowledge, accessible planning, social protection, livelihoods, community assets, inclusion, and adaptation partnerships. Work through the material with a current practice setting in mind, but remove identifying information from any examples you record.

What to pay attention to

- Local knowledge
- Accessible planning
- Social protection
- Livelihoods
- Community assets
- Inclusion
- Adaptation partnerships

Learning sequence

Start by defining the purpose of community-led adaptation and resilient services in relation to the course outcome. Notice where professional judgement is needed and where a local procedure must guide the next step.

Examine the practical implications of local knowledge, accessible planning, social protection, livelihoods, community assets, inclusion, and adaptation partnerships. Separate observations from assumptions, identify strengths as well as concerns, and be clear about information that must be checked with a person, family, colleague, or approved source.

Use a respectful, collaborative approach. Explain your role, seek informed participation where appropriate, and document only information that is relevant, accurate, and necessary for the purpose of the work.

When a concern exceeds your role, supervision, competence, or authority, pause and use the correct escalation route. A prompt referral and a clear handover can protect continuity of support.

Practice reflection

Choose a de-identified practice situation. What information would help you work through community-led adaptation and resilient services safely, and what would require consultation or a local policy check?

Module 3 Just transition, advocacy, and accountability

This module focuses on climate decisions, distribution of benefits and burdens, community voice, responsible evidence use, monitoring, and constructive advocacy. Work through the material with a current practice setting in mind, but remove identifying information from any examples you record.

What to pay attention to

- Climate decisions
- Distribution of benefits
- Burdens
- Community voice
- Responsible evidence use
- Monitoring
- Constructive advocacy

Learning sequence

Start by defining the purpose of just transition, advocacy, and accountability in relation to the course outcome. Notice where professional judgement is needed and where a local procedure must guide the next step.

Examine the practical implications of climate decisions, distribution of benefits and burdens, community voice, responsible evidence use, monitoring, and constructive advocacy. Separate observations from assumptions, identify strengths as well as concerns, and be clear about information that must be checked with a person, family, colleague, or approved source.

Use a respectful, collaborative approach. Explain your role, seek informed participation where appropriate, and document only information that is relevant, accurate, and necessary for the purpose of the work.

When a concern exceeds your role, supervision, competence, or authority, pause and use the correct escalation route. A prompt referral and a clear handover can protect continuity of support.

Practice reflection

Choose a de-identified practice situation. What information would help you work through just transition, advocacy, and accountability safely, and what would require consultation or a local policy check?

Course activity

Use the accompanying worksheet to apply the course sequence to a short case. Your completed activity should show what you noticed, the action you would take within your role, and what you would escalate or verify locally.

Assessment preparation

- Review the distinction between: climate inequity.
- Review the distinction between: participatory adaptation.
- Review the distinction between: inclusive services.
- Review the distinction between: community voice.
- Review the distinction between: accountability.
