# Leadership Supervision and Programme Management

Learner guide | SWP-033 | School of Community & Macro Practice

This guide supports a three-part learning sequence for Leadership Supervision and Programme Management. By the end of the course, you should be able to lead and support teams, use reflective supervision, and manage community programmes with accountable governance within a professional role.

Practice notice: Apply the law, organisational policy, supervision requirements, and approved referral pathways that govern your setting. This material supports learning and does not replace urgent safeguarding, clinical, or legal procedures.

## Learning objectives

- Lead and support teams, use reflective supervision, and manage community programmes with accountable governance within a professional role.
- Apply the key ideas from Leadership governance and role clarity.
- Apply the key ideas from Reflective supervision and team support.
- Apply the key ideas from Programme management and learning.

## Course structure

| Module | Focus | Suggested study time |
|---|---|---|
| 1. Leadership governance and role clarity | shared purpose, delegated authority, inclusive decisions, power, accountability, and professional boundaries | 10 to 15 minutes |
| 2. Reflective supervision and team support | supervision agreements, feedback, workload, wellbeing, safeguarding boundaries, escalation, and support for learning | 10 to 15 minutes |
| 3. Programme management and learning | delivery oversight, resourcing, governance risks, implementation monitoring, issue escalation, and proportionate learning adjustments | 10 to 15 minutes |

# Module 1 Leadership governance and role clarity

This module focuses on shared purpose, delegated authority, inclusive decisions, power, accountability, and professional boundaries. Work through the material with a current practice setting in mind, but remove identifying information from any examples you record.

## What to pay attention to

- Shared purpose
- Delegated authority
- Inclusive decisions
- Power
- Accountability
- Professional boundaries

## Learning sequence

Start by defining the purpose of leadership governance and role clarity in relation to the course outcome. Notice where professional judgement is needed and where a local procedure must guide the next step.

Examine the practical implications of shared purpose, delegated authority, inclusive decisions, power, accountability, and professional boundaries. Separate observations from assumptions, identify strengths as well as concerns, and be clear about information that must be checked with a person, family, colleague, or approved source.

Use a respectful, collaborative approach. Explain your role, seek informed participation where appropriate, and document only information that is relevant, accurate, and necessary for the purpose of the work.

When a concern exceeds your role, supervision, competence, or authority, pause and use the correct escalation route. A prompt referral and a clear handover can protect continuity of support.

## Practice reflection

Choose a de-identified practice situation. What information would help you work through leadership governance and role clarity safely, and what would require consultation or a local policy check?

# Module 2 Reflective supervision and team support

This module focuses on supervision agreements, feedback, workload, wellbeing, safeguarding boundaries, escalation, and support for learning. Work through the material with a current practice setting in mind, but remove identifying information from any examples you record.

## What to pay attention to

- Supervision agreements
- Feedback
- Workload
- Wellbeing
- Safeguarding boundaries
- Escalation
- Support for learning

## Learning sequence

Start by defining the purpose of reflective supervision and team support in relation to the course outcome. Notice where professional judgement is needed and where a local procedure must guide the next step.

Examine the practical implications of supervision agreements, feedback, workload, wellbeing, safeguarding boundaries, escalation, and support for learning. Separate observations from assumptions, identify strengths as well as concerns, and be clear about information that must be checked with a person, family, colleague, or approved source.

Use a respectful, collaborative approach. Explain your role, seek informed participation where appropriate, and document only information that is relevant, accurate, and necessary for the purpose of the work.

When a concern exceeds your role, supervision, competence, or authority, pause and use the correct escalation route. A prompt referral and a clear handover can protect continuity of support.

Choose a de-identified practice situation. What information would help you work through reflective supervision and team support safely, and what would require consultation or a local policy check?

# Module 3 Programme management and learning

This module focuses on delivery oversight, resourcing, governance risks, implementation monitoring, issue escalation, and proportionate learning adjustments. Work through the material with a current practice setting in mind, but remove identifying information from any examples you record.

## What to pay attention to

- Delivery oversight
- Resourcing
- Governance risks
- Implementation monitoring
- Issue escalation
- Proportionate learning adjustments

## Learning sequence

Start by defining the purpose of programme management and learning in relation to the course outcome. Notice where professional judgement is needed and where a local procedure must guide the next step.

Examine the practical implications of delivery oversight, resourcing, governance risks, implementation monitoring, issue escalation, and proportionate learning adjustments. Separate observations from assumptions, identify strengths as well as concerns, and be clear about information that must be checked with a person, family, colleague, or approved source.

Use a respectful, collaborative approach. Explain your role, seek informed participation where appropriate, and document only information that is relevant, accurate, and necessary for the purpose of the work.

When a concern exceeds your role, supervision, competence, or authority, pause and use the correct escalation route. A prompt referral and a clear handover can protect continuity of support.

## Practice reflection

Choose a de-identified practice situation. What information would help you work through programme management and learning safely, and what would require consultation or a local policy check?

## Course activity

Use the accompanying worksheet to apply the course sequence to a short case. Your completed activity should show what you noticed, the action you would take within your role, and what you would escalate or verify locally.

## Assessment preparation

- Review the distinction between: leadership accountability.
- Review the distinction between: role boundaries.
- Review the distinction between: reflective supervision.
- Review the distinction between: team wellbeing.
- Review the distinction between: programme governance.
- Review the distinction between: escalation.
- Review the distinction between: learning from delivery.
